I/We, the Authorizing Agent(s), do hereby certify, warrant, and represent that I/We understand:

D. Unless otherwise specifically permitted by law, **all** cremation are performed individually. For Identifying purposes, we utilize a unique numbering system. The cremation process begins with the placement of the cremation container into the cremation chamber where it is subject to intense heat and flame reaching temperatures upward of 1400 to 2000 degrees Fahrenheit or above. Due to the nature of the cremation process, any valuable material will not be recoverable. In the event of such valuable items in which I/we wish to retain, it is my/our responsibility to remove them or have them removed **prior** to the cremation process. Body prostheses, dental bridgework, or dental fillings within the remains will either be destroyed or will not be recoverable. Accordingly, the Authorizing Agent(s) represent and warrant to the Crematory that such materials have been removed from the remains or if not, that they may be removed from the remains and disposed of/recycled by the crematory or may be destroyed by the cremation process.

E. Following a cooling period, the cremated remains are then swept or raked from the cremation chamber. Cremated remains, depending on the bone structure of the decedent, will weigh approximately 4 to 8 pounds, and are usually white in color, but can be other colors due to temperature variations and other factors. Even with the exercise of reasonable care and the use of the Crematory's best efforts, it is not possible to recover all particles of the cremated remains of the Decedent; some particles may inadvertently become commingled with particles of other cremated remains remaining in the cremation chamber and/or other devices utilized to process (pulverize) the cremated remains. I/We hereby authorize the crematory to dispose of any such residual particles in any lawful manner it deems appropriate.
